REAL TESTING + MEASURED RESULTS

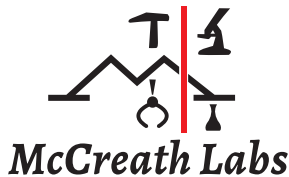

EQUALS

REAL RESULTS

Accurate testing is at the core of material conformity.

Corrupt raw materials produce an inferior finished product.

Rely on experienced experts with a proven, vetted track record.

THE SCIENCE IS PURE

INDUSTRIES SERVED

Steel

Scrap

Metallurgical Coke

Foundry

Coal

Petroleum Coke

THE McCREATH WAY

McCreath scientists produce superior testing results by handling sampling and raw materials in a professional manner so as to not corrupt the samples.

We collect material on-site to make our clients jobs and projects easy and accurate.

We engender trust by our continued accurate results.

OUR LAB

LABORATORY SERVICES

- » ISO/IEC 17025:2017 accredited facilities
- » More than a century of experience
- » Field testing and In-house testing
- » State-of-the-Art mineral inspection labs
- » Degreed and knowledgeable experienced chemists and technicians on-staff
- » Full composition, trace elemental and contamination analysis
- » ASTM and ISO standard compliant

SAMPLING SERVICES

- » On-site representative sampling of raw materials leading to accurate results
- » Compliant sampling methods following ASTM & ISO standards
- » On-site gross sample preparation reducing the amount of your material removed from inventory

MATERIAL INSPECTIONS

- » On-site visual inspection of alloys
- » Standard vessel/barge inspection prior to loading to avoid load contamination

MATERIAL CONSULTANT

- » Service extends beyond sampling and testing
- » Interpretation consultation of analysis
- » Trouble-shooting, Optimization, high-level analysis, and problem solving consultations
- » Broad knowledge base of seasoned professionals
